

## ...MOVIE DIRECTORS DON'T CARE

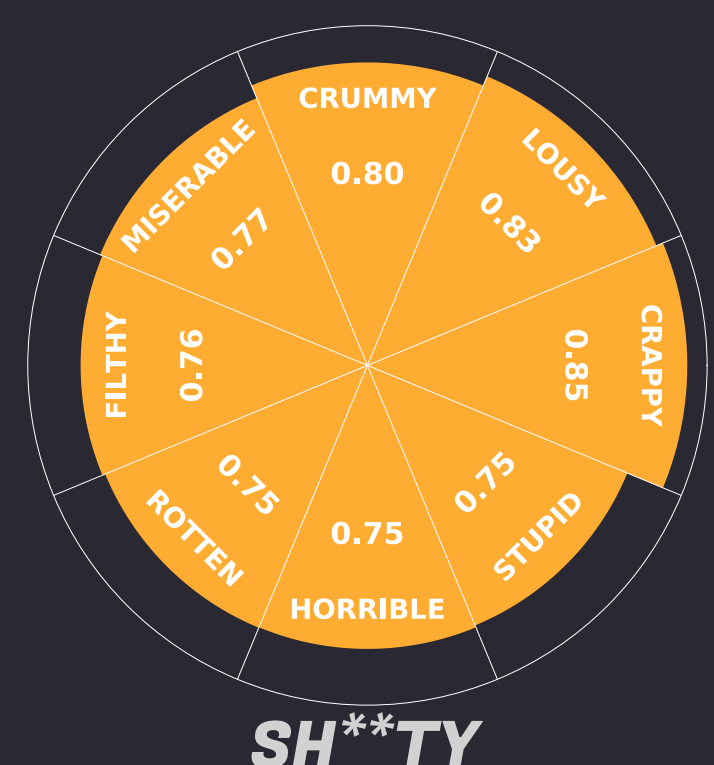

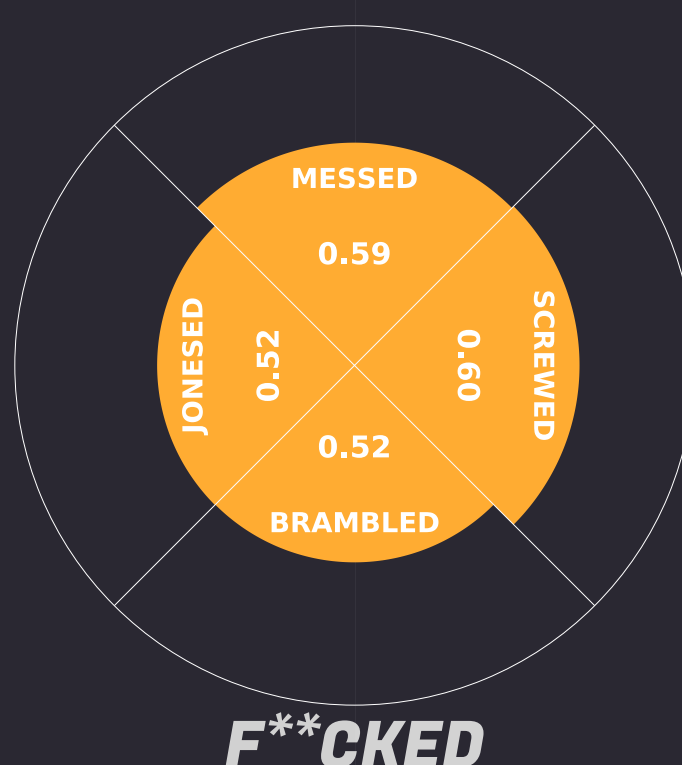

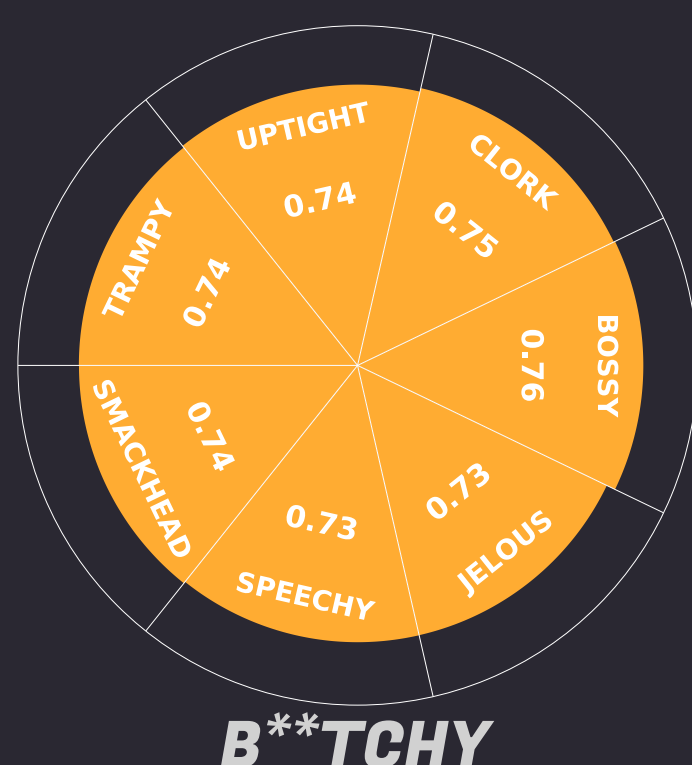

[illegible]

These two dotted, which in between there is a drop of racial slurs, lines mean respectively moment when Barack Obama won his first president election and moment when Donald Trump won a president election.

Hard curses are any f-word variations. Soft curses are any other. You can see all the curses in a word map on the top of the poster. The bigger the word, the more often it is used.

## IS THERE ANY WAY TO REPLACE THESE WORDS? LET'S TRY COSINE SIMILARITY

The idea is simple - the bigger the radius of a slice (or value inside the slice) the bigger the similarity to the curse word.
